

# My Nature Diary

- Keep track of what is just outside your window!
- Use our diary as an example to get started and download a template to fill in.
- Click on the underlined links to try some activities and find out more!
- Get some tips on “what to look out for” and check back for more ideas soon!

# Here is our Diary for the last couple of weeks

Today	I saw/heard/smelt/felt	In the garden/balcony/out the window	And I thought..	So I...
April 8 <sup>th</sup>	<u>Heard some loud birdsong</u>	Out the window in a tree on my street	I wish the birds would come out so I could see them!	<u>Made a bird feeder and hung it on a branch closer to my window</u>
April 10 <sup>th</sup>	Saw a bee landing on some flowers	In my garden	I wonder what type of flowers they like best	<u>Watched this video to learn about how bees dance to tell each other how to find flowers to eat.</u>
April 17 <sup>th</sup>	Smelt something minty	In the flower pot on my balcony.	Yum! The mint we planted last year has grown back!	Picked some and made some minty water.
April 15 <sup>th</sup>	Saw a fox when I was going to bed	Jumping over the wall into my neighbour's garden	It can jump so high! I wish I could watch it during the day.	<u>Made something catch some clues about it- a footprint detector!</u>
