

There are many pollutants that affect the quality of our air we breathe.

Some of the common ones emitted from fossil fuel transport are:

Carbon dioxide CO₂ - Particulate Matter PM - Carbon monoxide CO

Nitrogen oxides NO_x - Sulphur dioxide SO₂ - Ozone O₃

We could tell you all about them but.....we'd like you to investigate them for yourself. Pick one, some or all of the pollutants above. Then below are some ideas to look at for each one.

Name of pollutant:	
Where it comes from? hint: See our Sources of Air Pollution resource
