

After reading the story about Iqbal, did you start thinking about how you cook at home? And maybe even how many things you do in and around your home that need electricity and other forms of energy?

Now it is your turn. Please start a list below of all the things you do that require energy: Good Luck!

(See if you can do it all in one go without forgetting something © I bet when you show the list to the members of your family they will help you add one or two)

THINGS THAT USE ENERGY:

	If you prefer drawing, you may also draw your activities that need energy below:
