

SUSTAINABLE CITY

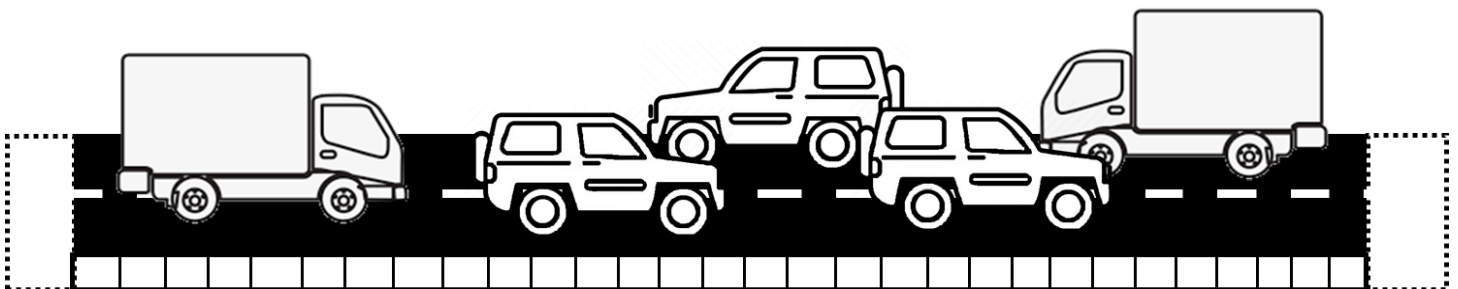

What do you think makes a city sustainable? What do you think makes a city not sustainable?
Follow the directions to create an unsustainable and sustainable city with this activity!

DIRECTIONS:

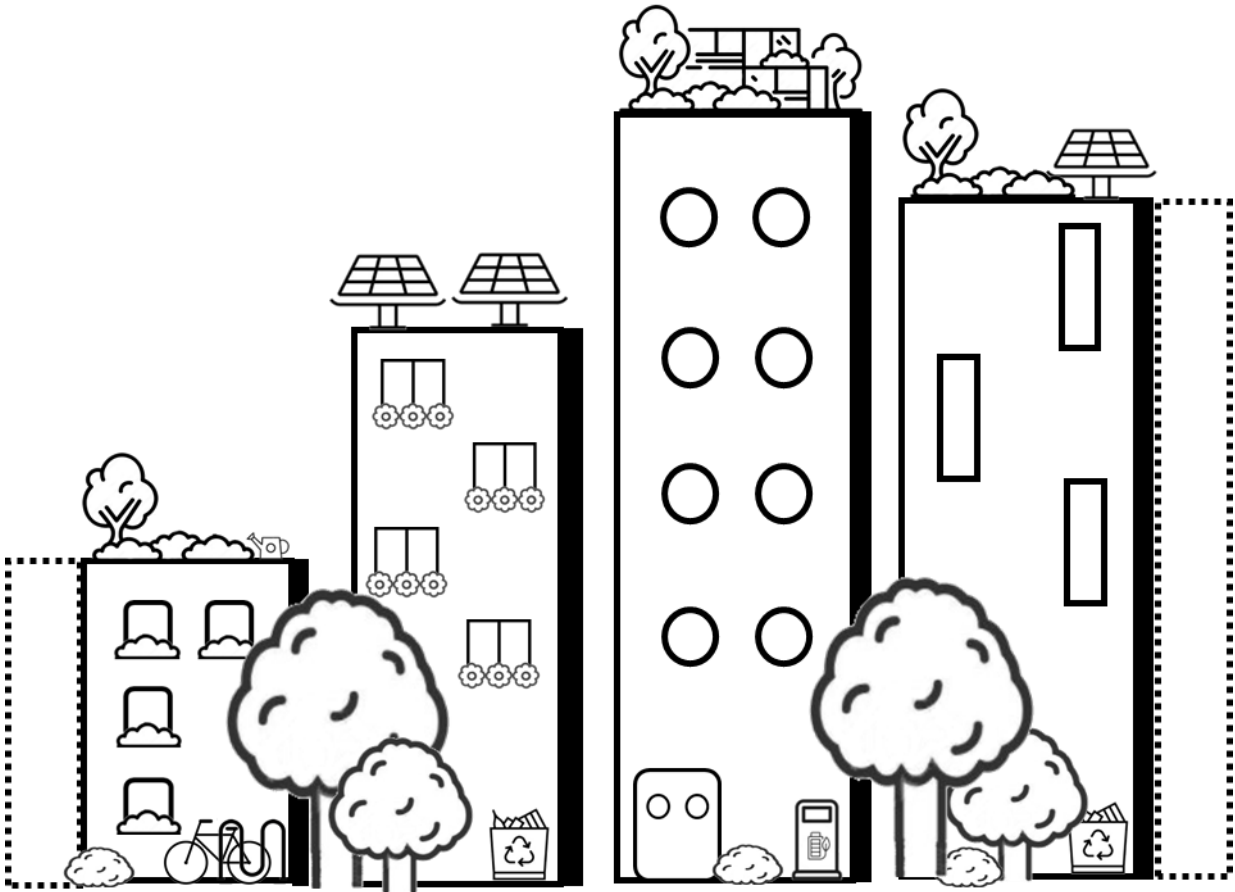

1. Colour all pieces of the city.
2. Cut out all pieces of the city.
3. Glue/ tape the piece labelled '**BACK**' to a coloured piece of paper (any colour will do) and trace a curve over it. Then cut. Do this with two different colour papers, so the **BACK** piece is each glued/taped to a different piece of paper.
4. Tape or glue the tabs on the **FRONT** and **MIDDLE** pieces for the sustainable city to one of the pieces of paper with the back glued/ taped on. Do the same with the unsustainable city pieces and the other **BACK**.
5. Glue/ tape the back of the curved top pieces together.
6. Add any additions you want using coloured paper, pencils, or anything else!
7. You have completed your city!
