

Marine Themed Arts and Crafts!

Age Group: Junior and Senior Primary

Draw Along Jellyfish

What material do you need:

- Paper
- A pencil (pencil sharpener)
- Colour's: coloured pencils, markers, crayons or paints.
- If using paint, you will need brushes, water and newspaper (to stop the mess)

What do you do then?

- Simple draw along with the pictures below
- Remember to use the full page

To start we draw a semi-circle shape like this one

Next we add a wavy line linking both sides, with at least 5 loops

Now on the top left add 1 long and 1 short bobble, so you know the body as jelly

Now we can add some more details from the centre of each loop draw a curved line towards the top with a small circle at the bottom of each line.

Now for the Armsto add a long wave line that joins the body

Like before we add a second Arm with a wave line

Now we can add some stingers, but not as long, and much narrower than the main Arms.

To add more detail and danger, you can add zig zag line at the end of the stinger

To add more detail to the arms add a few curved line to a few of the bends, 3 curved lines getting smaller as they go.

If you want / need more instruction you can Draw along with Rob in a handy tutorial video:
