

Marine Themed Arts and Crafts!

Age Group: Junior and Senior Primary

Draw Along Sunfish

What material do you need:

- Paper
- A pencil (pencil sharpener)
- Colour's: coloured pencils, markers, crayons or paints.
- If using paint, you will need brushes, water and newspaper (to stop the mess)

What do you do then?

- Simple draw along with the pictures below
- Remember to use the full page

Start with the lips

From the lips start to make the body

From the body on each side we draw big fins

Next we add the tail fin

Finish the body with a round line

Next we add the tail fin

Now we add the small side fin

Next we add a circle for the eye

Add more detail to the eye

To give our Sunfish more detail, we can add some lines on the fins

To give our fish more life we can add a few air bubbles

If you want / need more instruction you can Draw along with Rob in a handy tutorial video:
