Age Group: Junior and Senior Primary

## Draw Along Turtle

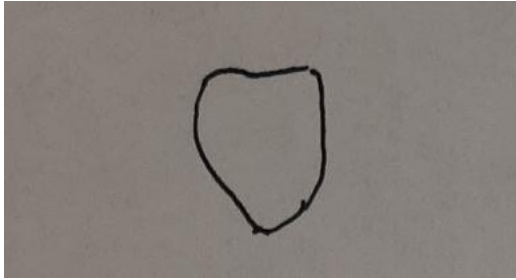

### What material do you need:

- Paper
- A pencil (pencil sharpener)
- Colour's: coloured pencils, markers, crayons or paints.
- If using paint, you will need brushes, water and newspaper (to stop the mess)

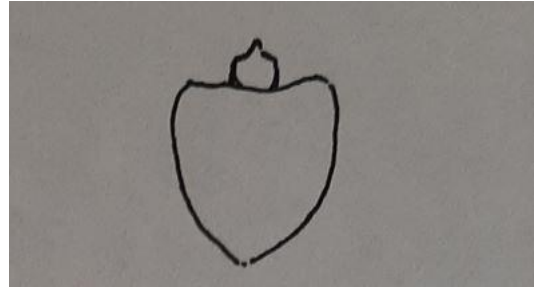

### What do you do then?

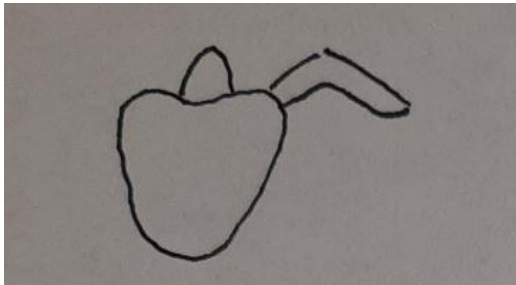

- Simple draw along with the pictures below
- Remember to use the full page

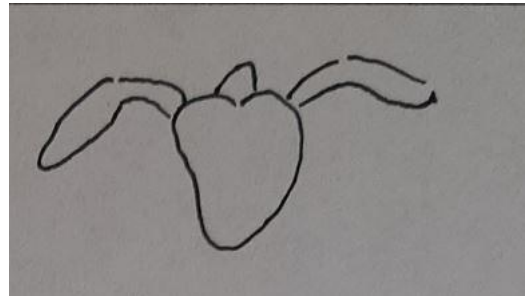

To start we draw a shell, that looks a bit like a shield

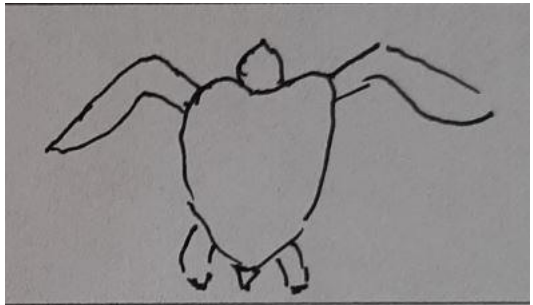

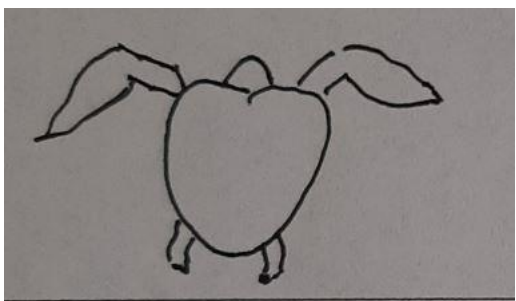

On the top of the shell we put the head, with a little point at the top for the beak

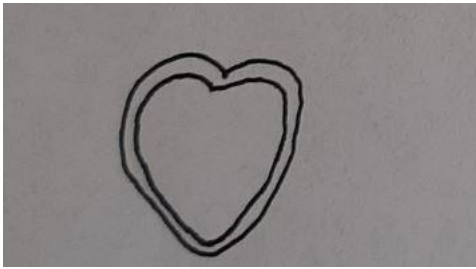

The arms of the turtle are like wings starting in the shoulder of the shell

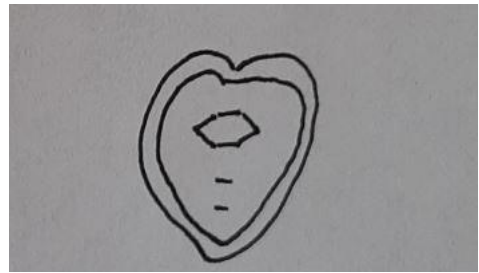

The feet of the turtle are much shorter and like flippers, with a small pointy tail in the bottom centre

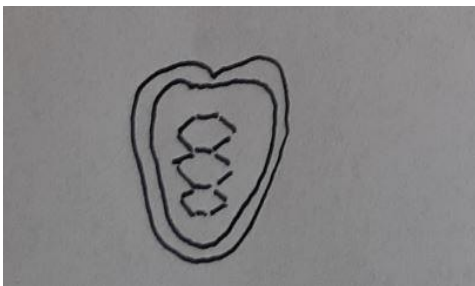

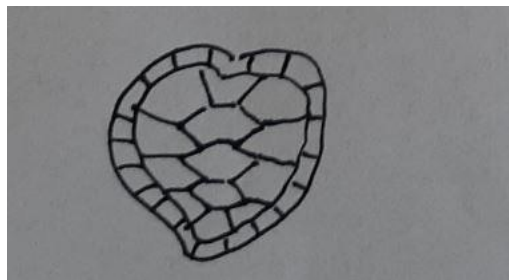

Next we add detail to the shell, start by drawing a second line inside the shell that follows the same shape

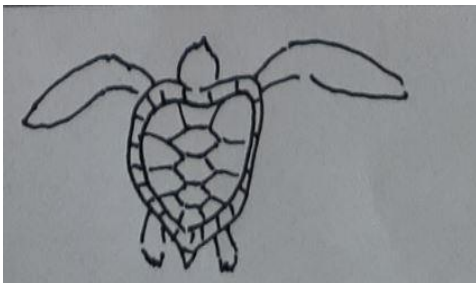

Then add a diamond shape and 2 short lines this

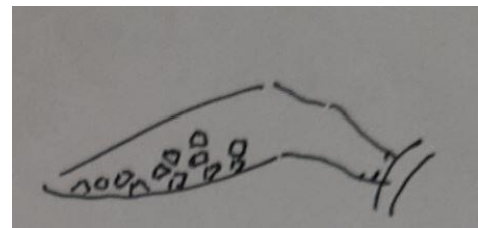

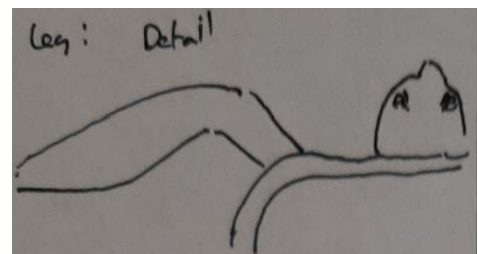

Adding more detail we make the lines into 3 connecting diamond shapes

We then connect each Dimond to the inside line of the shell and add lines to break up the outer ring

If you want to add more detail , add eye's and some freckles on the leg.

If you want / need more instruction you can Draw along with Rob in a handy tutorial video:
