

# Global Goals 10: Reduced Inequalities

Discussion Questions

## Instructions:

Reduced Inequalities is a complex global goal, which can provoke great discussions. Watch the video that dives into the challenges faced when reduced inequalities are not addressed, and then learn about the solutions. Discuss the questions before and after to gain different perspectives and better understand the issue as a whole.

---

## Discussions Questions Before:

- What do you think it means to have reduced inequalities?
  - Can you think of something (i.e. tall curb on footpath, no crossing, etc.) that could be an obstacle for someone else and not you?
  - How do you think we can solve challenges that arise from not talking about reduced inequalities?
- 

## Meet the Normals- Adventures in Universal Design Video:

## Discussion Questions After:

- Does a bus stop near your house have any of the obstacles the Normals faced?
  - Why do you think it is important to involve the people using the bus stop while designing it?
  - What other travel or every day challenges besides riding the bus do you think the Normals could face?
  - Why is *Universal Design* important?
-
