

Global Goals 12: Responsible Consumption and Production

Activity Sheet

Instructions:

This craft activity is designed to give students a better understanding of how the circular economy works. Instead of the linear system where we take, make and dispose of items, we can work off of a more circular system where we reuse or remodel unwanted items into something else rather than dispose of them.

Activity:

- You will need:
 - An old jumper
 - Felt
 - Fabric glue
 - Sequin string
 - Stencil
 - Sharpie/marker
 - Scissors
 - Watch the video below and learn how to transform an old jumper.
 - Discuss the importance of waste prevention and upcycling items.
-

[Video: Christmas Jumper](#)

Discussion:

- Can you think of other items that could be reused or repaired rather than thrown away?
 - Do you think we could reuse more items rather than buying new ones?
 - How can we help to reduce single use items and encourage reusable items? (you can look at where your school uses single use plastic items and see if you can think of an alternative that could be used instead).
-
