How much CO2 did you save on your journey to school?

Class carpooling monitoring sheet

Did you know that every time you travel 1km approximately **13 balloons of CO2** are created

- 1. Calculate the distance you travel to school. How many balloons of CO2 are created?
- 2. Record students who carpool and how many balloons they saved by doing so.
- 3. At the end of the week calculate how many balloons were saved.
