

June - Nature Spotter Sheet

You may notice these Cleavers or “Sticky backs” growing around other plants or getting stuck to your clothes!

Forest Shield Bug is one of many types of Shield Bug you may find.

Green Shield Bug is another! You need to look carefully to spot them as they have excellent camouflage.

As we get into summer you might find plants like nettles growing very tall!

Red soldier beetles are a good sign to find in your garden as they eat aphids!

The warm weather means you should be able to spot all kind of butterflies!
