

The Lorax Craft Mission

Today we would like you to create a craft or draw a picture based on the book.

If you would like to hear the story again to refresh your memory you can find the Lorax book [here](#)

Ideas for your art project today:

- Draw or paint your own silly looking tree and name it. You can also decide what the tree is used for? Or, if you are very ambitious you could even create a 3D structure of your tree. We can't wait to see your creations 😊
- Create your own Thneed. What colour is it, what is it used for? You can draw/paint it or as before create a 3D structure
- Draw the Lorax and tell us what else he could have said to stop the Oncler cutting down the truffula trees
- Watch [this step by step video](#) on how to create your own Truffula trees
- Lots more craft ideas can be found on the next page and [here](#)

We would love to see your creations so if you like you can send us your pictures to bodriscoll@eeu.antaisce.org so we can share a collage to show off all your work!

Have fun with
your craft
mission!

A Minecraft Mushroom growing Truffula Tree made in creator mode by Ollie Scott

A tree that grows lollipops created by Lizzy Scott :
