

How to Make Bike Rim Wreaths

Green-Schools Travel

Four Simple Steps

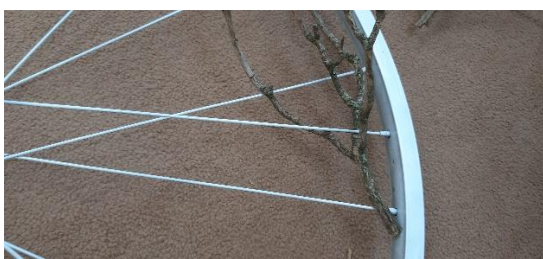

1. Ask your local bike shop for some old bike rims. Why not use old paint from your shed to paint the bike rims?

2. Gather branches that can bend slightly or some green foliage.

3. Weave the branches in and out through the spokes. Weave them all in the same direction.

4. Use natural string to tie some of the branches and foliage to the rim.

And they are ready to hang!

Why not make a nest from moss, dried cleavers, twigs or hay? Add some paper birds or paper flowers that will last for a long time in your wreath.

Can you think of any other natural material that you could make a wreath from???
