

Travel Awareness Survey

Green-Schools: Global Citizenship Travel - Survey

This survey is designed to review the extent to which students at your school are aware of how our travel choices are connected to global issues. Once the survey identifies an area where awareness could be improved, pick one of those topics to focus on. You can also reach out to your Travel Officer for extra resources and workshops to help raise awareness. You will need to repeat the survey in year two of the programme and compare results to measure change. Keep results from both surveys to fill in the renewal application.

Instructions:

1. Read out the questions in the classroom and ask students to record the answers in their notebooks. Briefly explain to students why the survey is important and how their answers will help. You can find the presentation to share with pupils on the screen available on our website.
 - For primary schools please only complete with 3rd – 6th classes.
 - For larger schools (300 students+) surveying 30% of the school population is sufficient – with a cap of 120 students.
2. Review and classify each response, assign an overall awareness category based on the percentages, and document the results.
3. Categorize Responses:
 - **Poor:** Answered "No" or "I'm not sure" with no or incorrect examples.
 - **Average:** Answered "Yes" with no or vague examples.
 - **High:** Answered "Yes" with clear and accurate examples.
4. Determine Overall Awareness:
 - **Poor:** 60% or more of the answers are Poor.
 - **Average:** 60% or more of the answers are Average, with less than 60% Poor.
 - **High:** 60% or more of the answers are High, with few or no Poor responses.
