

# PRIMARY WATER SCHOOL OF THE YEAR

## Scoil Mhuire

*County Laois*

Scoil Mhuire in Laois have a strong environmental ethos in their school and the best example of this is their school garden, Ár Spás Glas, where parent volunteers and students help with sowing seeds for seasonal harvests. Their garden was even featured on Nationwide! The school work with the local community by selling and displaying our produce at events such as Apple Fest.

By working on the Water theme, the school decided to work on a sustainable irrigation system for their Ár Spás Glas. They were kindly gifted a container from a local haulage company and were also donated three IBC tanks. They are in the process of putting the container near the new stormproof polytunnel and the IBC tanks on the roof of the container to create their own water harvesting irrigation system to support their garden year-round.
