## New words to learn: word search page

**Name:** .....

**Class:** .....

**Date:** .....

- **Biodiversity:** from 'Bio' meaning life and 'diversity' meaning lots of different types, Biodiversity is all living things on planet earth.
- **Roots:** A root. is a part of a plant that is usually hidden underground. Roots have several jobs. They hold the plant in the ground and keep it upright. They take water and food from the soil
- **Habitat:** is the home of an animal or a plant. Almost every place on Earth, from the hottest desert to the coldest iceberg, is a habitat for some kinds of animals and plants.
- **Evergreen:** Evergreen plants are plants that don't lose their leaves , because they "stay green" all year long.
- **Insect:** Insects are a type of small animal with 6 legs, bodies split into three parts and external skeletons (exoskeletons). Insects are part of a bigger group called arthropods, which also includes spiders and centipedes.
- **Plant:** Plants are living things that grow from the soil and turn light from the Sun into food. The plants can be big giant trees or small, tiny patches of moss.
- **Wildflower:** A wildflower is any type of flower that grows naturally in the wild. Wildflowers are usually native to a certain habitats.
- **Pollen:** Pollen is a fine powder produced by most plants when they reproduce (make new plants).
- **Native:** Native plants are plants that grow naturally in Ireland. These plants have been here since the last Ice Age.
- **Blossom:** to make flowers. The apple trees blossom before they grow fruit.
- **Seeds:** Seeds are the small parts made by plants from which new plants grow.
