Robin Habitat Hero

Seen in Ireland: Year Round

Common Name: Robin Irish Name: Spideóg

Scientific Name: Erithacus rubecula

Size: The Robin grows to be 14cm long from its beak to its tail, and it weighs just 20grams.

Habitat (where it lives): Robins will nest in garden birdhouses, in woods, hedges, and in walls covered with Ivy.

Diet: Robins eat worms and insects. But they also eat fruit, like apples and berries.

Life: Robins usually live between 1 and 2 years but can life longer. The oldest known Robin lived to be 19 years old!

Robin Life Cycle

In Autumn the chicks will move away from their parents, and they will spend the Winter on their

own.

In **Spring** the Robin finds a partner and builds a nest

By late Summer the chicks have hatched and are being fed food by both parents, until they are ready to fly.

In **Summer** the mammy lays about 5 eggs in the nest. She sits on them to keep them warm.

Robin

Some more Facts:

- Robins will start looking for a partner in Spring.
- The cup-shaped nest is built by the mammy.
- It is made of leaves and moss and is lined with soft materials like hair.
- The female will lay 4-6 eggs.
- She sits on the eggs to keep them warm for 10 13 days; her partner will bring her food, so she doesn't get too hungry.
- The chicks hatch without feathers and need their parents to give them food and warmth.
- Both the mammy and the daddy look after the nestlings.
- The chicks start to leave the nest (fledge) at two weeks old.
- Parents help the little chicks for about 3 weeks after they leave the nest.
- In Autumn and winter all Robins begin to live on their own for a few months, until Spring arrives.
- Robins are very friendly! Robins often follow gardeners around the garden hoping to catch insects that they have dug up.
- If you spend enough time working in your garden at school or at home, you will surely make friends with a Robin!
- There are about 4 million Robins in Ireland- nearly as many as people.
- Robins are also known as Robin Red Breast, but young robins have less red than the adults.
