

## **Sixth Edition**

**February 23<sup>rd</sup> to April 15<sup>th</sup>**

### **SDG 6 – Clean Water & Sanitation**

**SDG 6** is about a simple idea: everyone should have access to clean water and sanitation for their daily needs. But what does that really mean when water isn't available, safe or reliable?

In this competition, we invite you to pause and step into someone else's shoes. Choose a theme that speaks to you and respond through art. Try something new if you like: a collage, a short story, a drawing, a poem, a performance or something else entirely. Your work can be a way of showing curiosity and empathy - and this means a lot.
