

Name: Rachel Carson

Birth Date: 27 May 1907

Birth Location: Springdale,
Pennsylvania, U.S.A

Famous for...

Rachel Carson was a marine biologist and writer who became famous for her bestselling book ***Silent Spring***, which revealed the dangers of pesticides and helped launch the modern environmental movement. She also wrote bestselling ocean books that improved public understanding of marine ecosystems and the connection between human activity and nature.

Education

- Chatham University - Bachelor's in Biology
- Johns Hopkins University - Master's in Zoology

Impact Factor...

Her environmental writing directly influenced environmental policy and law, leading to the establishment of the U.S Environmental Protection Agency (EPA), which is tasked with protecting the environment with a focus on air, water, and wildlife.

Through her books she helped increase understanding how land, rivers and oceans are connected. Also, raising awareness on how human activity affects entire food chains and marine life. Rachel's work helped launch the modern environmental movement, encouraging governments, scientists and ordinary people to take responsibility for protecting the natural world.

Rachel Carson's ideas continue to shape modern environmental science and conservation. Her work laid the foundation for today's approach to pollution control, wildlife protection and sustainable environmental management.

- 
- **National Book Award (1952)** - Won for her book The Sea Around Us.
 - **Presidential Medal of Freedom** - Highest Civilian award in the United States.
